

# LeaseAccelerator Sandbox

Experiment with new ideas safely

**Looking for a way to boost your testing for your leasing program? With LeaseAccelerator Sandbox you get a safe environment that is separate from your production environments so you can create and test new integrations.**

Every company needs to test applications before they deploy new accounting environments, a new concept, or data processing processes. It's risky to run those tests in the Production Environment, and no one wants the system to be compromised.

LeaseAccelerator Sandbox enables companies to continuously improve their processes, test out new integrations and product features, and build efficient processes based on sandbox environment results. LeaseAccelerator Sandbox is easy to reset and reformat which allows its continuous usage throughout the development and testing cycles. This makes LeaseAccelerator Sandbox ideal for safely testing out various product capabilities and solution integrations without fear of damaging other programs or systems.

## Sandbox advantages

---

Research and eliminate compatibility issues with existing programs while developing and testing in our Sandbox environment

---

Full feature development and testing in parallel system enable new process improvements

---

---

Leverage process visibility to understand comprehensive user journey

---

Efficient training in secure business environments

---

Sustained development of new features and integrations

---

---

Unlimited experimenting with various applications without the risk of system compromising

---

Seamless learning in testing environments

---

LeaseAccelerator provides a global lease lifecycle automation platform that improves free cash flow and ensures long-term compliance across equipment and real estate assets. Thousands of users rely on our Software as a Service (SaaS) platform to manage and automate 700,000 leases valued at \$200 billion across 5 million assets in 172 countries that generated 8 billion journal entries.
